## JOB OBJECTIVE

I am a professional Multi-support IT Developer, alternating in a software development company. I have always been passionate about IT, and through my studies I have developed a good versatility in my work in IT development, graphics, communication and project management.

In addition, a 3-month internship in Latvia allowed me to develop my autonomy and professional adaptation when I was still in High National Diploma (Management and Nature Protection) before I converted.

## LANGUAGES

French

English
